Jonathan Andujo

Senior Software Engineer | .NET, Cloud & AI Platforms

C# • SQL Server • Distributed Systems • Azure AI • Azure & AWS

jonathan_andujo@outlook.com • +52 614 217 1150 • linkedin.com/in/jandujo github.com/jonathanandujo

PROFESSIONAL SUMMARY

Senior software engineer with 19+ years of experience delivering enterprise software, cloud platforms, distributed systems, and AI infrastructure. Proven record of building engineering platforms adopted by hundreds of engineers, driving large-scale modernization initiatives, and improving scalability, reliability, and operational efficiency across global organizations.

CORE EXPERTISE

AI Platforms: Azure Machine Learning (AML), Azure OpenAI (AOAI), SFT, RFT, Evaluation Workflows, LangGraph, LoRA Fine-Tuning, Local Model Deployment, Responsible AI, Microsoft Copilot Tuning

Cloud & Architecture: Azure, AWS, IaC, Bicep, Kubernetes, Azure Data Factory, ADLS Gen2, Cosmos DB, Distributed Systems, High Availability, HPA, Argo CD, Cost Optimization

Observability & AI Serving: Prometheus, Tempo, Local LLMs

Engineering: C#, .NET 10, .NET Core, .NET Framework, SQL Server, React, Angular, JavaScript, TypeScript, Node.js, REST APIs, Redis, CI/CD, Azure Pipelines, Git, YAML

Quality & Delivery: NUnit, Moq, SpecFlow, Playwright, SonarQube, Agile, SOLID

Leadership: Software Architecture, Technical Strategy, Cross-Team Delivery, Mentoring

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Microsoft | Aug 2021–Sep 2026

Copilot Tuning | Jul 2025–Sep 2026

- Led platform engineering for model fine-tuning and Azure AI infrastructure, improving scalability, GPU utilization, and engineering productivity through self-service machine learning provisioning.
- Upgraded 50+ projects from .NET 8 to .NET 10 and built Azure OpenAI automation for onboarding, quota management, failover, monitoring, and RBAC.
- Designed orchestration for SFT/RFT workflows across Power Automate, Azure Data Factory, and Azure Machine Learning.

Customer Insights | Apr 2023–Jul 2025

- Reduced build pipeline execution time by 67%, migrated APIs from .NET Framework to .NET Core, and deployed Kubernetes services for Microsoft Cosmic API in APAC.
- Developed scale-testing capabilities reaching 800,000 requests/sec and mentored engineers in SQL Server performance and database engineering practices.

Neuron Engineering Platform | Aug 2021–Apr 2023

- Built an internal engineering platform adopted by 400+ engineers across multiple organizations.
- Reduced SQL query response time from 2s to 150ms, enabling 10x traffic growth without additional infrastructure investment.
- Led migration from Node.js to React/.NET Core and mentored interns managing thousands of Azure Data Factory pipelines.

Lead Software Engineer | Civix | Nov 2020–Aug 2021

- Automated CI pipelines with Git, Azure Pipelines, and YAML.
- Reduced SQL Server stored procedure execution time by 90% and mentored developers in .NET architecture and engineering practices.

Software Engineer Lead / .NET Architect | Tiempo Development | Jan 2019–Oct 2020

- Architected and led development of an Azure-hosted application supporting 3,000+ users, reducing infrastructure costs by 70%.
- Reduced defects by 21% through stronger testing and engineering practices.

Software Engineer Lead / Architect | Grupo Ultra | Apr 2018–Jan 2019

- Increased sales revenue by 15%, reduced commission-calculation time by 85%, and saved $10,000 in operational costs.
- Improved customer satisfaction by 20% through support tooling modernization and AWS-based modernization efforts.

Senior Software Engineer | Best Day Travel Group | Oct 2016–Apr 2018

- Designed travel-platform architecture supporting 150,000+ requests/sec.
- Improved portal performance by 50% with Redis caching and reduced booking costs by 15%.

Software Engineer Lead | TAC Global Solutions | Jun 2014–Sep 2016

- Led ERP and CRM development initiatives, improving lead conversion by 15%.
- Reduced billing discrepancies by 70% and inventory overstock by 20%.

Software Developer | ADS Systems | Jul 2012–Apr 2014

- Developed RFID telemetry payment systems and scalable ERP capabilities.
- Reduced warehouse picking time by 90% and built a payroll platform integrated with external tax-validation services.

Web Developer | Grupo Industrial Advantage Tecnologia | Jul 2011–Jul 2012

- Developed e-commerce applications, improved SEO, and built queue-management systems for banks and government offices.

ENTREPRENEURIAL EXPERIENCE

Founder & Software Architect | VYTES | Sep 2007–Oct 2020

- Built business software and electronic invoicing products supporting 40+ clients and improved payroll-system performance by 80%.
- Built Kubernetes and AI automation platforms using GitOps, HPA, Prometheus, Tempo, Playwright, LangGraph, and local AI models.

EDUCATION

Master’s in IT Management, TecMilenio University

Bachelor’s in IT Engineering, Universidad Tecnológica de Chihuahua

CERTIFICATIONS

Azure Fundamentals (AZ-900) • Azure AI Fundamentals (AI-900) • AWS Cloud Practitioner Essentials
